

ENRICH YOUR LIFE !

**CHANGING CANADIANS' HEALTH - ONE PERSON
AT A TIME**

Product Index

C-Curity™

Item # 010

Quantity: 90 capsules, 605 mg each

Retail Price: \$39.95

As a free radical scavenger, vitamin C keeps many different parts of you humming like a well-tuned motor. Robert A. Jacob, in a 1991 article in *The American Journal of Clinical Nutrition*, lists some of vitamin C's amazing feats as an antioxidant; for example, vitamin C prevents cardiovascular disease by protecting blood fats from being oxidized and transformed into dangerous plaque along artery walls. Vitamin C also protects the eyes from oxidation, helping prevent cataracts, macular degeneration and other assaults on sight. It also protects sperm from oxidative damage that can lead to infertility or dangerous mutations in a child who is conceived.

Human beings are unable to produce vitamin C within our bodies. This makes it especially crucial to ensure our vitamin C intake is adequate. In nature, there are at least seven forms of vitamin C. Each occurs naturally, some in fruit, others in vegetables, and each one plays an essential role in human nutrition. Most vitamin C products contain only one form of vitamin C: L-ascorbic acid. Because regular L-ascorbic acid is very acidic, and is absorbed in the mouth, it can cause problems such as canker sores, stomach upset and diarrhea. In addition, over time, chewable L-ascorbic acid tablets can destroy the enamel on your teeth.

Enrich makes it their business to ensure you receive the best quality formulations available. C-Curity incorporates calcium ascorbate, L-ascorbic acid, dietary ascorbigens, dehydroascorbic acid, isoascorbic acid, calcium isoascorbic palmitate and ascorbyl palmitate in addition to grapefruit pectin, bioflavonoids and EnriDole 3-C™(12 mg). Some of these forms of vitamin C are fat soluble which means they can stay in your intestines longer, adding additional anti-oxidant activity where it is needed. C-Curity is also pH-balanced so it will not cause diarrhea or sores.

Gold Specifics Brain Modulators Tablets

Advanced Multi-Nutrient Dietary Supplement
SUGAR, SALT AND STARCH
FREE SUITABLE FOR
VEGETARIANS

Brain Modulators offer the cognition-enhancing nutrients and fatty acids responsible for the normal, healthy functioning of the brain.

This formula supports proper neurotransmission, cerebral blood flow and membrane fluidity (membrane flexibility that permits neurons to communicate more efficiently).

Three (3) tablets provide:
Phosphatidylcholine 500 mg
Acetyl-L Carnite 300 mg
Vitamin B12 (cobalamin, dibenzozide) 200 mcg
Folic Acid 200 mcg
Phosphatidylserine (LECI- PS (TM) 160 mg
DHA (docohexaenoic acid) 120 mg

Standardized Ginkgo Biloba (24% ginkgoflavoglycosides/6% terpene lactones) 80 mg

LECI-PS^a is a registered trademark of Lucas Meyer, Inc.

Available in bottles of 50 tablets.

Tableted with these natural ingredients vegetable powdered cellulose, silica, vegetable magnesium stearate.

50 tablets £44.89

Gold Specifics Cardiovascular Tablets

Advanced Multi-Nutrient Dietary
Supplement

SUGAR, SALT AND STARCH
FREE SUITABLE FOR
VEGETARIANS

Cardiovascular Support offers
cardio-protective nutrients that
help maintain a healthy,
functioning cardiovascular
system.

This formula supports efficient
circulation, as well as, vascular
strength.

It also contains potent
antioxidants and advanced
phytonutrients that target the
heart.

Three (3) tablets provide:

Taurine 800 mg

Trimethylglycine (beet) 800 mg

Soy Isoflavone Concentrated 400
mg

L-Carnitine 300 mg

Magnesium (fully reacted
glycinate/oxide) 200 mg

Standardized Hawthorne Berry
Extract (1.8% vitexin) 125 mg

Cayenne Extract Power 100 mg

Coenzyme Q-10 (ubiquinon) 60
mg

Grape Seed Extract (95%
phenolics) 50 mg

Fully reacted chelates Albion
process patent #4,599,152

Chelazomes

Tableted with these natural
ingredients: vegetable powdered
cellulose, vegetable stearic acid,
vegetable magnesium stearate,
silica.

**Available in bottles of 60
tablets.**

Gold Specifics Cell Support Tablets

Advanced Multi-Nutrient Dietary Supplement
SUGAR AND SALT FREE
SUITABLE FOR VEGETARIANS

Cell Support offers cell-protective nutrients responsible for maintaining normal cellular growth, supporting normal immune function, and providing powerful antioxidant protection. This formula contains a unique group of phytonutrients - which are receiving a great deal of attention in both the traditional medical and alternative health communities - for the specific roles they play in protecting cells from free-radical damage.

Three (3) tablets provide:

Beta 1,3 Glucans (Yeast Cell Wall) 100 mg

D-Limonene 80 mg

Modified Citrus Pectin
(average molecular weight 15 KD) 400 mg

Soy Isoflavone Extract 400 mg

Standardized Red Reishi
Mushroom

Extract (4% triterpenes, 10% polysaccharides) 200 mg

KS-2 Standardized Shiitake
Mycelia

Extract (3.2% KS-2) 200 mg

Quercetin (dimorphandra) 200 mg

Indole-3-Carbinol 5 mg

Lutein (marigold flower) 5 mg

Lycopene (tomato) 5 mg

Tableted with these natural ingredients: vegetable powdered cellulose, vegetable stearic acid, vegetable magnesium stearate, silica.

Available in bottles of 50 tablets.

50 tablets £32.45

Gold Specifics

Advanced Multi-Nutrient Dietary Supplement

Cholesterol Tablets**SUGAR AND SALT FREE
SUITABLE FOR VEGETARIANS**

Cholesterol Modulators provide innovative natural ingredients that help maintain healthy cholesterol levels by inhibiting cholesterol production in the liver, interfering with cholesterol absorption, and providing powerful antioxidant protection. As part of a healthy diet and exercise regimen, this formula may not only help reduce total cholesterol levels in blood, but also increase the ratio of HDL (good) cholesterol to LDL (bad) cholesterol - and prevent oxidation of LDL cholesterol in arteries.

For many, it may be a natural complement to conventional cholesterol reduction treatments.

Three (3) tablets provide:

Standardized Gugulipid (2.5% guggulsterones) 600 mg

Tocotrienols 60 mg

Phosphatidylcholine 400 mg

Ultra Oat Bran Fiber 400 mg

Soy Isoflavone Concentrate 400 mg

Organic Garlic 300 mg

Xue Zhi Kang (fermented red yeast) 300 mg

Pantethine 200 mg

No-Flush Niacin (inositol hexanicotinate)

providing:

Niacin (vitamin B3)

Inositol 200 mg

Grape Seed Extract (95% phenolics) 50 mg

Organic Certification No. FT 045

Tableted with these natural ingredients: vegetable powdered cellulose, vegetable stearic acid, vegetable magnesium stearate.

Available in bottles of 60 tablets.

Gold Specifics GSH Modulators Vegicaps®

Advanced Multi-Nutrient Dietary Supplement
SUGAR, SALT AND STARCH
FREE SUITABLE FOR
VEGETARIANS GSH
(Glutathione) Modulators assist in
the production of GSH, a
powerful antioxidant and
detoxifier, which the body
produces to maintain general
health and well being.
GSH neutralizes cell-damaging
free radicals, detoxifies the liver
and binds heavy metals - such as
mercury and cadmium - that
destroy tissue.

This formula contains nutrients,
such as n-acetyl-l-cysteine, alpha
lipoic acid and selenium, which
are essential for the synthesis of
GSH.

It also includes vitamin C which
studies indicate can increase
tissue GSH levels.

Two (2) Vegicaps® provide:
NAC (n-acetyl-l-cysteine) 500 mg

Vitamin C (l-ascorbic acid) 500
mg

Alpha Lipoic Acid 120 mg

Selenium (l-selenomethionine)
100 mcg

Encapsulated with these natural
ingredients: vegetable powdered
cellulose, vegetable magnesium
stearate.

Vegicap capsule shell: vegetable
carbohydrate gum, glycerin.

**Available in bottles of 60
Vegicaps®.**

Gold Specifics Homocysteine Vegicaps®

Advanced Multi-Nutrient Dietary
Supplement
SUGAR, SALT AND STARCH
FREE SUITABLE FOR
VEGETARIANS
Homocysteine Modulators
contain nutrients, such as

trimethylglycine (TMG), vitamins B6 and B12 and folic acid, which are important methyl donors responsible for maintaining proper homocysteine levels in the body.

High levels of homocysteine, a metabolite of the amino acid methionine, are damaging to the cells that line the arteries and have been shown to play a role in the development of atherosclerosis (hardening of the arteries).

In healthy individuals, methionine converts to homocysteine and back to methionine.

This regulatory mechanism - called methylation - controls the amount of homocysteine in the body and requires sufficient available methyl groups (an organic group containing one carbon and three hydrogen atoms).

Two (2) Vegicaps® provide:
Trimethylglycine (beet) 1000 mg
Vitamin B6

(pyridoxine HCl, pyridoxal-5-phosphate) 50 mg

Vitamin B12 500 mcg

Folic Acid 400 mcg

Encapsulated with these natural ingredients: vegetable powdered cellulose, vegetable magnesium stearate.

Vegicaps capsule shell: vegetable carbohydrate gum, glycerin.

Available in bottles of 60

Vegicaps®

60 Vegicaps® £8.45

Gold Specifics Joint Modulators Tablets

Advanced Multi-Nutrient Dietary Supplement

SUGAR AND STARCH FREE

Joint Modulators help support and maintain healthy joint tissue.

This formula contains two of the most powerful cartilage -

protective agents: glucosamine sulfate and bovine cartilage - which is naturally rich in mucopolysaccharides, such as chondroitin sulfate.

Both glucosamine and chondroitin sulfates have been shown to be supportive agents in the health and repair of joint and cartilage tissue.

This formula includes ulva seaweed which contains an essential structural component of chondroitin sulfate, and vitamin C and manganese which help enhance cartilage composition. It also contains nutrients, such as standardized turmeric, grape seed extract and niacinamide that help inhibit collagen destruction by generating powerful anti-inflammatory and antioxidant activity.

Two (2) tablets provide:

Glucosamine Sulfate 1000 mg
 Bovine Cartilage 500 mg
 DLPA (DL-phenylalanine) 400 mg
 Standardized Turmeric Extract (95% curcuminoids) 200 mcg
 Ulva Seaweed 200 mg
 L-Proline 200 mg
 Vitamin B3 (niacinamide) 100 mg

Vitamin C (l-ascorbic acid) 100 mg

Grape Seed Extract (95% phenolics) 100 mg

Manganese (fully reacted glycinate) 4 mg

Fully reacted chelates Albion process patent # 4,599,152

Chelazomes

Tableted with these natural ingredients: vegetable powdered cellulose, vegetable stearic acid, vegetable magnesium stearate.

OPTEIN™

The 3-in-1 Wellness Beverage from Solgar

OPTEIN™, a new dietary supplement from Solgar is a high protein, low fat wellness beverage enriched with vitamins, minerals and phytonutrients.

OPTEIN™ is not only great tasting, it may also help to support the immune system, help produce energy and help you adapt to the physical stress of an active lifestyle.+++

OPTEIN™ comes in a powdered form and is available in both natural chocolate malt and natural vanilla cream flavors. Just one scoop added to 8 ounces of milk, rice milk, soy milk or water provides a wellness beverage that delivers multiple nutritional benefits and tastes terrific.

The OPTEIN™ formula also includes:

- 23 essential vitamins and minerals
- 7 sources of fiber including oat fiber, black currant fiber, apple fiber, lemon fiber, rice fiber, and apple pectin
- Protein from 3 Sources: Soy, Whey and Spirulina
- Phytonutrients including:
 - Blend of Kamut®, Barley and Wheat Grass
 - Blend of Reishi, Maitake and Shiitake mushrooms
 - Fruit polyphenols

And of course the two flavors currently available are all natural:

- Natural Vanilla Cream
- Natural Chocolate Malt

OPTEIN™, the 3-in-1 Wellness Beverage

OPTEIN™ is just one of the many high quality dietary supplement formulas brought to you by Solgar. Advancing the science of nutrition for over 50 years.

TITLE: Effect of flavonoids on the colorimetric determination

of **L-ascorbic acid** with
4-methoxy-2-nitroaniline

AUTHOR(S): Davidek, J.; Davidkova, E.

CORPORATE SOURCE: Zentralforsch. Inst. Lebensmittelind., Prague

SOURCE: Nahrung (1959), 3, 515-19

DOCUMENT TYPE: Journal

LANGUAGE: English

AB The colorimetric method of Schmall, et al. (C.A. 48, 956a), employing 4-methoxy-2-nitroaniline (I) for the detn. of **L-ascorbic acid** (II) in natural systems, has been subjected to a crit. analysis and has been found suitable and reliable for the detn. of II only

in exts. and materials which are not naturally colored (by flavonoids (III)) and rich in **pectin**. If III are present to the extent of an 8 fold excess, they interfere with the formation of the characteristic,

intense blue **color**, producing a brown-red **color**, instead, with I. Pectic substances are pptd. at the step where EtOH is customarily added, adsorbing part of the I, which reduces accuracy of the method even more. The addn. of iso-PrOH or another low-mol. alc. is necessary to elicit the characteristic, intense blue **color** during the reaction of II-contg. exts. with I.

AB An easy-to-swallow pharmaceutical compn. consists of .gtoreq.1 coated particles with a core which contains an active substance and a coat with .gtoreq.1 layers. The coating layer(s) contains .gtoreq.1 hydratable, pharmaceutically acceptable polymer which, on contact with saliva or water, forms a coherent, moldable, viscous mass with a slippery surface which does not adhere to the mucous membranes of the mouth, and which prevents the active substance-contg. particles from leaving the mass and releasing the active substance in the mouth cavity. The (outermost) coating layer contains .gtoreq.1 salivation-promoting agent. The properties of the coating make the compn. suitable for administering highly dosed or bad-tasting active substances and even for swallowing without any liq. Thus, a soln. of ciprofloxacin 2000, Crospovidone XL-M 110, PVP K90 60, water 900, and EtOH 1800 g was spray-coated onto sucrose crystals 0.3-0.6 mm in diam. to produce core particles, which were then coated first with a powd. mixt. of NaCl 50, Na saccharin 50, and Na carboxymethylstarch 50 g, and finally [after moistening with EtOH-H2O (1:1)] with a powd. mixt. of Na CM-cellulose 275 and talc 75 g.

AB Glucomannan is encapsulated with carboxylic acids which are coated with a hydrophobic substance, and the encapsulated matters are coagulated by heating with similarly coated alkalies to give coagulated products useful in noncaloric and imitation foods. Thus, a coagulated product (A) having neutral pH was prepd. in this manner from Konjak powder 75, carrageenin 10, Na alginate 3, xanthan gum 1, cellulose 5, herring oil-coated food additive-grade NaOH 2, and soya oil-coated citric acid 3.2 parts. Kneading ground fish meat 100, the A 20, salt 1.5, sugar 1.5, glucose 0.6, crab ext. 2.0, crab flavoring agent 0.5, and ice water 40 parts, molding, heating, and retort processing gave crab kamaboko (boiled crab meat paste).
